

ACP-600

High-speed automatic case packer

Ishida offers you advanced equipment and expertise, and the support you'd expect from a true partner with decades of highly successful experience working with the top names in the sector.

Ishida offers you the right equipment for the job, and the reassurance of knowing that you are using the very latest in proven snack food packaging technology.

Our ACP-600 fully automatic case maker and packer offers high-speed and flexible box packaging.

This state of the art machine packs up to 160 bags per minute, allows for automatic alignment of bags and has an integrated seal checker and weight checker.

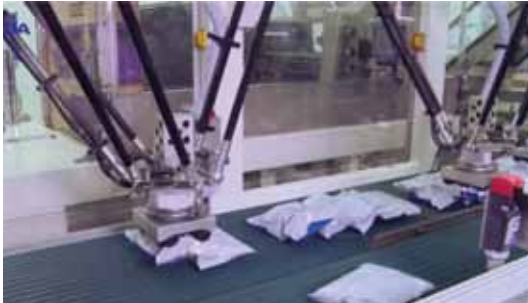

The ACP-600 automatic case packer is yet another example of Ishida's continued commitment to develop effective solutions to the challenges of weighing and packing snack foods.

ACP-600

Ishida's ACP-600 automatic high speed case packer incorporates a number of features that ensure this machine delivers effective performance.

Parallel Delta Robot

The parallel delta robot means it is capable of speeds of up to 160 bags per minute.

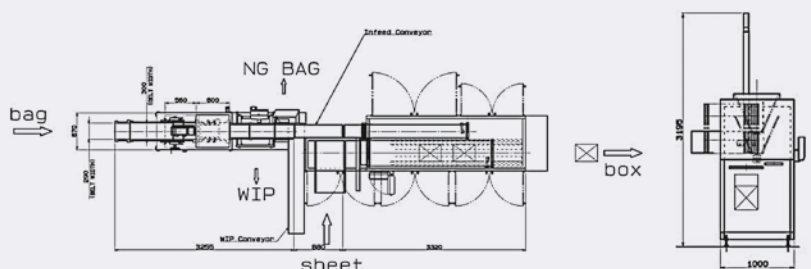

Automatic Alignment

Ishida designed sensing system checks each pack for correct orientation and spacings. No camera is required and therefore varying ambient light conditions are not an issue.

Every single pack alignment is recorded and can be viewed via playback system. This highlights problems such as jaw-alignment from bag-maker, product on the infeed conveyors etc.

Specifications		
Pack sizes	Maximum	Minimum
Length (mm)	350	130
Width (mm)	120	230
Air-fill (mm)	30	70
Weight (g)	300	-
Case sizes	Maximum	Minimum
Length (mm)	400	180
Width (mm)	310	200
Height (mm)	400	200
